PCSE – REAL LIFE PROJECT-2

PROJECT PROPOSAL TEMPLATE

REAL LIFE PROJECT-2
PROJECT PROPOSAL

- **Project Title:**
  (Enter Your Project Name Here)
- **Submitted By:**
- Student Name – Regl No
- **Course:** Certificate in _____
  Subject: Real Life Project – 2
  Guide Name:
  Institution Name:
  Academic Year:

PROBLEM STATEMENT

- Clearly describe:
  - What is the problem?
  - Who is facing this problem?
  - Why is it important to solve?
- (Write 5–8 clear sentences)

EXISTING SYSTEM

- Describe:
  - How is the problem currently solved?
  - What are the limitations?
    - Manual process?
    - Time-consuming?
    - Error-prone?
    - No proper records?

PROPOSED SYSTEM

- Explain:
  - What system/application are you proposing?
  - How will it solve the problem?
  - What makes it better than the existing system?

OBJECTIVES OF THE PROJECT

- List clear objectives:
  - To develop a _____ system
  - To automate _____
  - To reduce _____
  - To improve _____
  - To provide secure _____
- (4–6 measurable objectives)

SCOPE OF THE PROJECT

- Define:
  - ✓ What the system WILL do
  - ✗ What the system will NOT do
- This prevents scope creep.

TARGET USERS

Identify:

- Primary users
- Secondary users (if any)
- Technical level of users
- Devices they will use

Example:

- Admin
- Registered users
- Guest users

FUNCTIONAL REQUIREMENTS

List main features:

- User Registration/Login
- Add / Edit / Delete Records
- Search Function
- Reports Generation
- Admin Dashboard
- Notifications

- (Use bullet points)

NON-FUNCTIONAL REQUIREMENTS

- Specify:
  - ✓Security
  - ✓Performance
  - ✓Usability
  - ✓Reliability
  - ✓Compatibility
  - ✓Data backup

TECHNOLOGY STACK

Specify clearly:

- Frontend:
  - (HTML/CSS/JS/Flutter/etc.)
- Backend:
  - (PHP / Node.js / Python / etc.)
- Database:
  - (MySQL / MongoDB / etc.)
- Platform:
  - Web / Android / Cross-platform

SYSTEM ARCHITECTURE

Include:

- Simple block diagram
- Client → Server → Database structure
- OR Mobile App → API → Database

(Students must draw a diagram here)

DATABASE DESIGN

Include:

- List of main tables
- Key attributes
- Primary key
- Foreign key relationships

(Optional: Insert ER Diagram)

USE CASE DIAGRAM

Include:

- Actors
- Major system interactions

(Students may draw diagram using UML tools)

PROJECT TIMELINE

- Use simple timeline:

Week	Task
1–2	Requirement Analysis
3–4	System Design
5–8	Development
9	Testing
10	Documentation
11	Final Review

FEASIBILITY ANALYSIS

Include:

- Technical feasibility
- Time feasibility
- Economic feasibility
- Operational feasibility

RISK ANALYSIS

- Identify:
  - Lack of time
  - Technical difficulty
  - Data loss
  - Team coordination issues
- Also mention mitigation strategy.

EXPECTED OUTCOMES

- Describe:
  - ✓What will be achieved?
  - ✓Who will benefit?
  - ✓Long-term impact?

FUTURE ENHANCEMENTS

- Mention:
  - ✓ Mobile version
  - ✓ Cloud deployment
  - ✓ Payment integration
  - ✓ AI features
  - ✓ Multi-language support

CONCLUSION

Summarize:

- Problem
- Proposed solution
- Importance
- Feasibility

(5–6 strong closing sentences)
